Marina Abdalluh

Industrial Designer

[linkin/marina-nagy..](https://www.linkedin.com/in/marina-nagy-)

Introduction

About me

- I'm an Industrial Designer specializing in applied art within the Industrial Design Department. My passion lies at the intersection of functionality and creativity, where I focus on interactive design and interface development. With a keen eye for detail and a drive to innovate, I thrive on creating designs that not only look great but also enhance user experiences. My work involves translating complex ideas into intuitive and aesthetically pleasing interfaces, ensuring that technology seamlessly integrates into everyday life. I'm excited about exploring new possibilities in interactive design and constantly seek to push the boundaries of what's possible

Work Experience

2023

2022

2020

Digital Arts, DEPI

My team created five scenes representing the Egyptian civilization, using the initiative to use Arab landmarks and show them in an innovative way and with innovative ideas that take us through different times to express the authentic Arab identity, with Arabic music and a voice explaining this Paris in Arabic.

Industrial Design student,
Applied Arts, Helwan University

in the industrial design course 5 and 6, it was a service system for watering (based on contactless service) The aim of the system is to develop a watering system and a way for entrepreneurship by making it have a civilized appearance that reflects the society in which we live and also be available in a safe manner for our health and take into account animals and birds in addition to that so that we can enjoy a bright life that reflects us and our society

Industrial Design student,
Applied Arts, Helwan University

Where you are doing the interactive focus course 4 My project was to change the behavior of public bathroom users, and our goal was to design a street bathroom unit that would solve this problem. We conducted studies and developed ideas and arrived at creating a unit with audio guidance on how to use the bathroom and also put rewards and points for good use, which makes commitment to good behavior in dealing with public facilities
